STQA Practical No. 3

Write Test Cases in Excel Sheet for Social Media Application or Website

1. AIM

To prepare and document functional test cases for a social media application or website using Microsoft Excel.

2. OBJECTIVE

To design test cases for important social media functions: user registration, login, profile management, creating posts, uploading images, liking posts, commenting, following users, searching, notifications, privacy, and logout.

3. APPLICATION DETAILS

The application under test is a generic social media application or website. The testing type is Functional Testing, and the test cases are documented in Microsoft Excel. Features that a selected platform does not support are marked as Not Applicable rather than assumed.

4. TEST CASE DESCRIPTION

Test cases are prepared in Microsoft Excel to verify the functional behavior of a social media application. Each test case includes test inputs, expected output, actual output, test result, and comments. Recording these fields helps identify functional defects in a clear and repeatable way.

5. SOCIAL MEDIA APPLICATION SCREENSHOT

6. TEST CASE CHART

Test Scenario ID	SM-01
Test Case ID	SM-TC-04
Test Case Description	Verify successful login using valid credentials.
Test Priority	High
Pre-Requisite	The user has a registered account and access to an authorized test environment.
Post-Requisite	The user is authenticated and redirected to the appropriate home page or social media feed.

S.No.	Action	Inputs	Expected Output	Actual Output	Test Result	Test Comments
1	**SM-TC-01** (Registration & Login) Verify that the social media website opens successfully. 1. Open the browser. 2. Enter the website URL. 3. Observe the home or login page.	URL: https:// (authorized test environment)	Home or login page loads with no errors.	Not Executed	Not Run	Applies to any supported browser. Replace the URL with the test environment address.
2	**SM-TC-02** (Registration & Login) Verify registration using valid test details. 1. Click 'Sign up'. 2. Enter name, username, email, and password. 3. Click 'Register'. 4. Check the confirmation.	Name: Test User 01; Username: test_user_01; Email: test_user_01@example.com; Password: Test@1234 (dummy)	Account is created and the user is shown a success message or verification step.	Not Executed	Not Run	Use a dummy email address only. Verification step depends on the app.
3	**SM-TC-03** (Registration & Login) Verify validation for empty registration fields. 1. Open the Sign up page. 2. Leave all fields empty. 3. Click 'Register'.	All fields blank	Each required field shows a message such as 'This field is required'. Account is not created.	Not Executed	Not Run	Check that the form does not submit.
4	**SM-TC-04** (Registration & Login) Verify login using valid credentials. 1. Open the login page. 2. Enter username. 3. Enter password. 4. Click 'Log in'.	Username: test_user_01; Password: Test@1234 (dummy test account)	User is logged in and redirected to the home feed.	Not Executed	Not Run	Test account must be created for testing only.
5	**SM-TC-05** (Registration & Login) Verify login using an incorrect password. 1. Open the login page. 2. Enter a valid username. 3. Enter a wrong password. 4. Click 'Log in'.	Username: test_user_01; Password: Wrong@9999 (dummy)	Login fails with an error such as 'Incorrect username or password'. User stays on the login page.	Not Executed	Not Run	Error text should not reveal which field is wrong (security good practice).
6	**SM-TC-06** (Registration & Login) Verify login with empty required fields. 1. Open the login page. 2. Leave username and password empty. 3. Click 'Log in'.	All fields blank	Validation message is shown. Login is not attempted.	Not Executed	Not Run	Check each field separately as well.
7	**SM-TC-07** (Profile Management) Verify that the user profile opens successfully. 1. Log in with a valid test account. 2. Click the profile icon or username. 3. Observe the profile page.	Username: test_user_01	Profile page opens and shows the username and profile details.	Not Executed	Not Run	Profile layout depends on the platform.
8	**SM-TC-08** (Profile Management) Verify editing and saving profile information. 1. Open the profile page. 2. Click 'Edit profile'. 3. Change the bio text. 4. Click 'Save'. 5. Reload the page.	Bio: This is a sample test bio.	Updated bio is saved and still shown after reload.	Not Executed	Not Run	Check that the bio change is visible to the same account only after saving.
9	**SM-TC-09** (Profile Management) Verify updating the profile picture, if supported. 1. Open 'Edit profile'. 2. Click 'Change photo'. 3. Select a small test image (JPG/PNG). 4. Click 'Save'.	Test image: sample_avatar.jpg (dummy image, under 2 MB)	New profile picture is displayed after saving.	Not Executed	Not Run	Mark Not Applicable if the platform has no profile picture feature.
10	**SM-TC-10** (Posts & Feed) Verify creating a text post. 1. Log in. 2. Click 'Create post'. 3. Type the post text. 4. Click 'Post'.	Post text: This is a sample test post.	Post is published and shown with the correct text.	Not Executed	Not Run	Confirm the text is not truncated.
11	**SM-TC-11** (Posts & Feed) Verify creating a post with an image, if supported. 1. Click 'Create post'. 2. Click 'Add photo'. 3. Select a test image. 4. Add the post text. 5. Click 'Post'.	Image: sample_post.jpg (dummy image); Post text: This is a sample test post with an image.	Post appears with both the image and the text.	Not Executed	Not Run	Mark Not Applicable if image posts are not supported.

12	**SM-TC-12** (Posts & Feed) Verify that a newly created post appears in the feed. 1. Create a post (SM-TC-10). 2. Go to the home feed. 3. Refresh the page.	Post text: This is a sample test post.	The new post appears at the top of the feed.	Not Executed	Not Run	Ordering may depend on the platform's feed algorithm.
13	**SM-TC-13** (Posts & Feed) Verify liking and unliking a post. 1. Open a post in the feed. 2. Click the 'Like' button. 3. Check the like count. 4. Click 'Like' again.	Target post: any post by test_user_02	Like count increases by 1, then decreases by 1. Button state changes each time.	Not Executed	Not Run	Check the count after page refresh as well.
14	**SM-TC-14** (Posts & Feed) Verify adding a comment to a post. 1. Open a post. 2. Type a comment in the comment box. 3. Click 'Comment' or press Enter.	Comment text: Nice post, this is a test comment.	Comment appears below the post with the correct text and username.	Not Executed	Not Run	Check that empty comments are not posted.
15	**SM-TC-15** (Posts & Feed) Verify deleting the user's own post, if supported. 1. Open your own post. 2. Click the menu (three dots). 3. Click 'Delete'. 4. Confirm deletion.	Post created in SM-TC-10	Post is removed from the feed and profile after confirmation.	Not Executed	Not Run	Mark Not Applicable if deletion is not supported.
16	**SM-TC-16** (Social Interaction) Verify following and unfollowing another user, if supported. 1. Search for test_user_02. 2. Open the profile. 3. Click 'Follow'. 4. Click 'Following' to unfollow.	Username: test_user_02	Follow status changes correctly and the follower count updates.	Not Executed	Not Run	Mark Not Applicable if the platform has no follow feature.
17	**SM-TC-17** (Social Interaction) Verify searching for another user by username. 1. Click the search box. 2. Type the username. 3. Press Enter.	Search term: test_user_02	The matching user profile appears in the search results.	Not Executed	Not Run	Also try a partial name and an unknown name.
18	**SM-TC-18** (Social Interaction) Verify that notifications appear for supported interactions. 1. Log in as test_user_01. 2. Log in as test_user_02 on another browser. 3. Like or comment on test_user_01's post. 4. Check the notifications on test_user_01.	Action: like/comment by test_user_02 on post of test_user_01	test_user_01 receives a notification about the interaction.	Not Executed	Not Run	Notification timing may vary. Mark Not Applicable if notifications are not supported.
19	**SM-TC-19** (Privacy & Logout) Verify the applicable privacy settings. 1. Open account settings. 2. Change profile visibility to 'Private'. 3. Log in as test_user_02. 4. Try to view test_user_01's posts.	Setting: Private account for test_user_01	Posts are hidden from users who do not follow test_user_01.	Not Executed	Not Run	Mark Not Applicable if the platform has no privacy setting.
20	**SM-TC-20** (Privacy & Logout) Verify successful logout and access protection after logout. 1. Click 'Log out'. 2. Press the browser Back button. 3. Try to open the home feed URL directly.	Logged-in test account: test_user_01	User is logged out, and protected pages redirect to the login page.	Not Executed	Not Run	Check that the session is not restored after Back button use.

8. RESULT

Twenty functional test cases have been designed and organized in Microsoft Excel for a social media application. They cover five modules: registration and login, profile management, posts and feed, social interaction and search, and privacy and logout. The test cases have been prepared but not executed on any live application, so every test result is recorded as 'Not Run'.

9. CONCLUSION

Systematic test cases help verify that social media features behave as expected. They make it easier to detect defects, check that each function gives the correct output, and improve the overall quality of the application. Recording inputs, expected results, and actual results in one Excel sheet also makes reporting and retesting simpler.
